(57) **ABSTRACT**

The present invention aims at providing a composite of a surface-modified fluoro resin film and a thermoplastic resin bonded to each other, and medical equipment containing the composite. A method for producing a fluoro resin/thermoplastic resin composite includes roughening a surface of a fluoro resin film by ion beam irradiation from an ion source, and pressure-bonding the surface-modified fluoro resin film obtained in the surface roughening step and a thermoplastic resin while maintaining the thermoplastic resin in a fluid state.
